Index

Note: Page numbers of article titles are in boldface type.

A
Allergic reactions, to local anesthesia in oral and maxillofacial surgery, 373
Alveolar osteitis, as complication of dentoalveolar surgery, 401–413
cause, 402
incidence, 402
onset, 402
risk cofactors, 402
symptoms, 402
treatment, 402–403
Anatomy, fascial, of space infections, 417–418
in presurgical assessment of risk of dentoalveolar nerve injury, 396–397
local considerations in dentoalveolar infections, 416–417
of craniocervical necrotizing fasciitis due to dentoalveolar infections, 426–430
osteoradionecrosis of the mandible, 455–456
Anesthesia, local. See Local anesthesia.
Antibiotics, selection of, for dentoalveolar infections, 420–421
Antimicrobial therapy, of osteomyelitis of the jaws, 410
Articaine. See Local anesthesia.
Autogenous grafts. See Bone grafting.

B
Bisphosphonates, dentoalveolar complications associated with use of, 443–453
drug therapeutic action, 443–445
frequency of use, 445
general craniomaxillofacial effects of, 445
history of use, 444–445
osteonecrosis of the jaws related to, 445–451
oral risk factors in, 447
staging and treatment, 447–451
Bleeding disorders, management during surgery, 387–394
iatrogenic coagulation abnormalities, 388–389
platelet disorders and abnormalities, 389–390
drug-related platelet effects, 390
thrombocytopenias, 389–390
postoperative, 392
surgical treatment considerations, 390–392
systemic factor problems, 387–388
hemophilia, 388
other congenital factor deficiencies, 388
von Willebrand disease, 388
Bone cancers, bisphosphonate-related osteonecrosis of the jaw in patients with, 443–453
Bone grafting, alveolar, complications of, 433–442
at grafted site, 438–440
at harvest sites, 433–435
distant, 436–438
local, 434–436
biology of bone formation, 433
Burden of proof, in legal proceedings for dentoalveolar complications, 478
Burs, loss of, in legal proceedings for dentoalveolar surgery, 384–386

C
Clodronate, with tocopherol and pentoxyfylline for treatment of osteoradionecrosis, 461
Coagulation abnormalities, iatrogenic, management of hemostasis during surgery, 388–389, 390–392
Complications, of dentoalveolar surgery, 369–484
alveolar osteitis and osteomyelitis of the jaws, 401–413
bisphosphonate-related osteonecrosis of the jaws, 443–453
dentoalveolar infections, 415–424
craniocervical necrotizing fasciitis resulting from, 425–432
dentoalveolar nerve injury, 395–400
displacement, 379–386
failure to diagnose pathology, 465–473
hemostasis and bleeding disorders, 387–394
in bone grafting, 433–442
legal aspects of, 475–484
osteoradionecrosis, 455–464
with local anesthesia, 369–377
Computed tomography (CT), diagnostic, for osteomyelitis of the jaws, 405–406
Cone-beam computed tomography (CBCT), complications of, documentation tips to avoid legal claims, 482–483
Contributory negligence, in legal proceedings for dentoalveolar complications, 478
Coronectomy, vs. extraction to avoid dentoalveolar nerve injury, 399–400
Craniocervical necrotizing fasciitis, resulting from dentoalveolar infections, 425–432
anatomy and pathophysiology, 426–430
diagnosis and microbiology, 425–426
incidence and frequency, 431
treatment, 431–432
Index

D

Damages, in legal proceedings for dentoalveolar complications, 478
Degeneration, nerve, after dentoalveolar nerve injury, 398
Dental care, to minimize osteoradionecrosis complications, 459
Dentoalveolar surgery, complications in, 369–484
alveolar osteitis and osteomyelitis of the jaws, 401–413
bisphosphonate-related osteonecrosis of the jaws, 443–453
dentoalveolar infections, 415–424
cranioventral necrotizing fasciitis resulting from, 425–432
dentoalveolar nerve injury, 395–400
displacement complications, 379–386
failure to diagnose pathology, 465–473
hemostasis and bleeding disorders, 387–394
in bone grafting, 433–442
legal aspects of, 475–480
displacement complications, documentation tips to avoid legal claims, 482
Diagnosis, failure to diagnose pathology in oral and maxillofacial surgery, 465–473
Displacement complications, in oral and maxillofacial surgery, 379–386
implant mismanagement, 383–384
intratemporal space, 380–383
other displaced objects, 384–386
sinus, 380
teeth, 379–380
Documentation, of medical consultations for clearance for dentoalveolar surgery, 479–483
complications, 479–483
cone beam computed tomography, 482–483
extractions, 479–480
grafts, 483
implants, 482
infections, 482
jaw fractures, 482
nerve injuries, 480–482
orthognathic procedures, 483
sinus infections, 483
tips, 479
Drug-induced platelet defects, management of hemostasis during surgery, 390–392
Dry socket. See Alveolar osteitis.

E

Extraction, coronectomy vs., to avoid dentoalveolar nerve injury, 399–400
Extractions, complications of, documentation tips to avoid legal claims, 449–480

F

Facial pain, neuralgia-inducing cavitation osteonecrosis, 405
Factor deficiencies, congenital, management of hemostasis during surgery, 388, 390–392
Failure to diagnose pathology, in oral and maxillofacial surgery, 465–473
Fault, comparative, in legal proceedings for dentoalveolar complications, 478
Fractures, postsurgical jaw, documentation tips to avoid legal claims, 482

G

Grafting, documentation of medical consultations prior to, 483
Grafts. See Bone grafting.

H

Harvest sites, for autogenous bone grafting, complications at, 433–438
distant, 436–438
local, 434–436
Head and neck cancer, osteoradionecrosis of mandible as complication of radiation therapy for, 455–464
Head and neck infections, dentoalveolar, 415–424
cranioventral necrotizing fasciitis resulting from, 425–432
Hemorrhage, management of hemostasis and bleeding disorders during surgery, 387–394
iatrogenic coagulation abnormalities, 388–389
platelet disorders and abnormalities, 389–390
drug-related platelet effects, 390
thrombocytopenias, 389–390
postoperative, 392
surgical treatment considerations, 390–392
systemic factor problems, 387–388
hemophilia, 388
other congenital factor deficiencies, 388
von Willebrand disease, 388
History, of local anesthesia, 369–370
Hyperbaric oxygen therapy, of osteomyelitis of the jaws, 410
of osteoradionecrosis, 460

I

Iatrogenic coagulation abnormalities, management of hemostasis during surgery, 388–389, 390–392
Imaging, diagnostic, for osteomyelitis of the jaws, 405–407
in bisphosphonate-related osteonecrosis of the jaws, 447–451
in diagnosis of osteoradionecrosis of mandible, 457–458
in presurgical assessment of risk of dentoalveolar nerve injury, 396–397
Implants, complications of, documentation tips to avoid legal claims, 482
misplacement of, 383–384
Infections, dentoalveolar, 415–424
  craniocervical necrotizing fasciitis resulting from, 425–432
  anatomy and pathophysiology, 426–430
diagnosis and microbiology, 425–426
  incidence and frequency, 431
treatment, 431–432
due to local anesthesia, 373
  fascial anatomy of space infections, 417–418
  local anatomic considerations, 416–417
  microbiology and antibiotic selection, 420–421
  natural history of progression, 416
  other, 418–420
  patient assessment, 415–416
  specific head and neck, 418
  postoperative, documentation tips to avoid legal claims, 482, 483
Inferior alveolar nerve, injury associated with dentoalveolar surgery, 395–400
Informed consent, and dentoalveolar complications, 478
Informed refusal, and dentoalveolar complications, 478–479
Infratemporal space, displacement of, during oral and maxillofacial surgery, 380–383
Injury, nerve. See Nerve injury.
Instrumentation, surgical, loss of, during oral and maxillofacial surgery, 384–386
Intensity-modulated radiation therapy, to minimize osteoradionecrosis complications, 459

J
Jaw fractures, postsurgical, documentation tips to avoid legal claims, 482
Jaws, osteomyelitis of. See Osteomyelitis. osteonecrosis of. See Osteonecrosis.

L
Legal issues, failure to diagnose pathology in oral and maxillofacial surgery, 465–473
  with dentoalveolar complications, 475–484
  burden of proof, 478
  comparative fault/contributory negligence, 478
  damages, 478
  documenting medical consultations, 479–483
  tips for avoidance of claims, 479–483
  informed consent, 478
informed refusal, 478–479
law and standard of care, 475–477
  legal principles, 475
  standard of care for referrals, 479
  written laws (code), 477–478
  written standards of care, 477
Lidocaine. See Local anesthesia.
Lingual nerve, injury associated with dentoalveolar surgery, 395–400
Local anesthesia, complications of, in oral and maxillofacial surgery, 369–377
  history of, 369–370
  regional, 370–373
    ocular, 372–373
    paresthesia, 370–372
    trismus, pain, and infection, 373
  systemic, 373–375
    allergic reactions, 373
    methemoglobinemia, 375
    toxicity, 373–375

M
Magnetic resonance imaging (MRI), diagnostic, for osteomyelitis of the jaws, 406
Malpractice, failure to diagnose pathology in oral and maxillofacial surgery, 465–473
Mandible, osteoradionecrosis as complication of radiation therapy for head and neck cancer, 455–464
Maxillofacial infections, dentoalveolar, 415–424
Maxillofacial surgery, complications of. See Complications.
  failure to diagnose pathology in, 465–473
  legal standards associated with complications of, 475–484
Methemoglobinemia, due to local anesthesia in oral and maxillofacial surgery, 375
Microbiology, of dentoalveolar infections, 420–421
  of craniocervical necrotizing fasciitis due to, 420–421
  of osteomyelitis of the jaws, 407–409

N
Neck infections, craniocervical necrotizing fasciitis resulting from dentoalveolar infections, 425–432
Necrotizing fasciitis, craniocervical, resulting from dentoalveolar infections, 425–432
  anatomy and pathophysiology, 426–430
  diagnosis and microbiology, 425–426
  incidence and frequency, 431
  treatment, 431–432
Needles, loss of, during oral and maxillofacial surgery, 384–386
Negligence, contributory, in legal proceedings for dentoalveolar complications, 478
Index

Nerve injuries, documentation tips to avoid legal claims, 480–482
Nerve injury, dentoalveolar, 395–400
  classification, 397–398
  clinical assessment, 399
  coronectomy vs. extraction, 399–400
  incidence of, 395–396
  nerve degeneration and regeneration, 398
  risk assessment, 396–397
Neuralgia-inducing cavitational osteonecrosis, 405

O
Ocular complications, due to local anesthesia in oral and maxillofacial surgery, 372–373
Odontogenic infections, dentoalveolar, 415–424
Oral surgery, complications of. See Complications.
  failure to diagnose pathology in, 465–473
  legal standards associated with complications of, 475–484
Orthognathic procedures, documentation of medical consultations prior to, 483
Osteitis, alveolar, as complication of dentoalveolar surgery, 401–413
  cause, 402
  incidence, 402
  onset, 402
  risk cofactors, 402
  symptoms, 402
  treatment, 402–403
Osteomyelitis, of jaws as complication of dentoalveolar surgery, 401–413
  antimicrobial therapy, 410
  cause, pathogenesis, and microbiology, 407–409
  classification, 404
    acute, 404
    chronic (nonsuppurative), 405
    chronic (suppurative), 404–405
    neuralgia-inducing cavitational, 405
    other related conditions, 405
  diagnostic imaging, 405–407
    computed tomography (CT), 405–406
    conventional radiography, 405
    magnetic resonance imaging (MRI), 406
    positron emission tomography (PET)/CT, 407
    scintigraphy, 406–407
  hyperbaric oxygen therapy, 411
  incidence, 407
  surgical correction, 409–410
  treatment, 409
Osteonecrosis, of the jaws, bisphosphonate-related, 443–453
  drug therapeutic action, 443–445
  frequency of use, 445
  general craniomaxillofacial effects of, 445
  history of use, 444–445
  oral risk factors in, 447
  staging and treatment, 447–451
Osteoporosis, bisphosphonate-related osteonecrosis of the jaw in patients with, 443–453
Osteoradionecrosis, as complication of radiation therapy for head and neck cancer, 455–464
  anatomy, 455
  classification, 456–457
  diagnosis, 457–458
  pathophysiology, 455–456
  prevention, 459
    dental care, 459
    role of intensity-modulated radiation therapy, 459
    risk factors, 458–459
    treatment, 459–462
    conservative management, 459–460
    hyperbaric oxygen, 460
    pentoxyfylline-tocopherol-clodronate combination, 461
    surgery, 461–462
    ultrasound, 460–461

P
Packings, loss of, during oral and maxillofacial surgery, 384–386
Pain, as complication of local anesthesia in oral and maxillofacial surgery, 373
  neuralgia-inducing cavitational osteonecrosis, 405
Paresthesia, due to local anesthesia in oral and maxillofacial surgery, 370–372
Pathology, failure to diagnose in oral and maxillofacial surgery, 465–473
Pathophysiology, of craniocervical necrotizing fasciitis due to dentoalveolar infections, 426–430
  of osteoradionecrosis of the mandible, 455–456
  Pentoxyfylline, with tocopherol and clodronate for treatment of osteoradionecrosis, 461
Platelet disorders, management of hemostasis during surgery, 389–390, 390–392
Positron emission tomography (PET), diagnostic, for osteomyelitis of the jaws, 407
Postoperative hemorrhaging, in patients with bleeding disorders, 392

R
Radiation therapy, osteoradionecrosis of mandible as complication of, 455–464
  intensity-modulated, to minimize, 459
Radiology. See Imaging.
Referrals, for dentoalveolar complications, standards of care, 479
Regeneration, nerve, after dentoalveolar nerve injury, 398
Index

Risk assessment, presurgical, for dentoalveolar nerve injury, 396–397

Scintigraphy, diagnostic, for osteomyelitis of the jaws, 406–407

Screws, loss of, during oral and maxillofacial surgery, 384–386
Sinus, displacement of, during oral and maxillofacial surgery, 380
Sinus infections, postsurgical, documentation tips to avoid legal claims, 483
Standards of care, for referrals, 479 the law and, 475–477 written, 477
Surgical instrumentation, loss of, during oral and maxillofacial surgery, 384–386
Surgical therapy, for osteoradionecrosis, 461–462 of dentoalveolar infections, 421–422 of osteomyelitis of the jaws, 409–410

Teeth, displacement of, during oral and maxillofacial surgery, 379–380

Thrombocytopenia, management of hemostasis during surgery, 389–390, 390–392
Tocopherol, with pentoxifylline and clodronate for treatment of osteoradionecrosis, 461
Toxicity, of local anesthesia in oral and maxillofacial surgery, 373–375
Trigeminal nerve, injury associated with dentoalveolar surgery, 395–400
Trismus, due to local anesthesia in oral and maxillofacial surgery, 373

Ultrasound, for treatment of osteoradionecrosis, 460–461

von Willebrand disease, management of hemostasis during surgery, 388, 390–392

Wound healing, in dentoalveolar surgery, 401–402
