Index

Note: Page numbers of article titles are in **boldface** type.

A
Adjunctive agents, use with Intravenous sedative/anesthetic medications in OMS, 447–450
dexmedetomidine, 448–450
ketamine, 447–448
Adrenal insufficiency, and anesthetic emergencies in OMS, 510–511
Airway emergencies, respiratory, in OMS, **479–486**
Airway equipment, emergency, for anesthesia in an OMS practice, 377–378
Airway evaluation, for oral surgery in adults, **385–399**
emergency management task training and team crisis simulations, 393
evaluating complex airways, 389–392
airway infection, 390
congenital disease, 390
foreign body, 391
obesity, 389–390
rheumatoid arthritis, 390
trauma, 391
tumors, 391
evaluating potentially difficult airways, 386–389
anatomic considerations, 387–388
visibility of oropharyngeal structures, 388–389
grading difficulty of mask ventilation, 386
grading difficulty of tracheal intubation, 386
importance of preoperative evaluation, 392
scope of the problem and incidence, 385–386
Alfentanil, intravenous, use in OMS, 445
Allergy, and anaphylaxis management during oral surgery, **401–406**
mild allergy, 401
patient evaluation for local anesthetic reactions, 403–405
initial results, 405
intradermal screening protocol, 404–405
long-term results, 405
severe allergy, 401–403
Ambulatory anesthesia, management of antihypertensive agents in, 499–500
American Dental Society of Anesthesia, emergency management workshops, 393
Anaphylaxis, allergy and, management during oral surgery, **401–406**
patient evaluation for local anesthetic reactions, 403–405
initial results, 405
intradermal screening protocol, 404–405
long-term results, 405

Anatomy, differences in pediatric patients, 468–469
Anesthesia, 341–527
in oral and maxillofacial surgery, 341–527
adult airway evaluation, **385–399**
emergency management task training and team crisis simulations, 393
evaluating complex airways, 389–392
evaluating potentially difficult airways, 386–389
ggrading difficulty of mask ventilation, 386
ggrading difficulty of tracheal intubation, 386
importance of preoperative evaluation, 392
scope of the problem and incidence, 385–386
allergy and anaphylaxis management during, **401–406**
mild allergy, 401
patient evaluation for local anesthetic reactions, 403–405
severe allergy, 401–403
assessment and monitoring, **367–371**
cardiovascular anesthetic complications during, **487–506**
perioperative hypertension, 487–501
perioperative hypotension, 501–504
common medical illnesses that affect, **407–438**
acute respiratory infection, 415–416
asthma, 416–417
atrial fibrillation, 414
chronic kidney disease, 429–431
chronic liver disease, 424–426
cocaine abuse, 426–427
congestive heart failure, 413–414
COPD, 418–419
coronary artery disease, 409–411
depression, 431–432
diabetes, 420–424
epilepsy/seizures, 428–429
exogenous steroids, 427–428
gastroesophageal reflux disease, 426
hypertension, 407–409
obesity and obstructive sleep apnea, 419–420
opioid tolerance and abuse, 434–435
pacemakers and implantable cardioverter defibrillators, 414–415
smoking, 417–418
thyroid diseases, 432–434
valvular heart disease, 411–413

Anesthesia (continued)
determining appropriate modality, setting, and team, 357–366
choosing correct modality, 365
deep, 361
deep sedation, 361–363
general, 363–364
hospital-based, 364–365
local, 358–359
local with nitrous oxide, 359
minimal sedation, 359–360
moderate, 360–361
outpatient surgery and, 364
patient assessment, 357–364
development of, 341–355
emergencies in, 507–514
coagulation, 513
endocrinopathies, 508–511
malignant hyperthermia, 507–508
neurologic, 511–513
equipment for, in an OMS practice, 373–383
airway armamentarium, 377–378
communication equipment, 374
emergency drugs, 378–379
inhalational anesthetic exposure control, 374
lighting system, 381–382
manifold system and remote gas storage, 373–374
monitors, 379–380
nitrous oxide exposure control, 374
office fire safety protocol, 374
operating suite, 379
oxygen and supplemental gas delivery system, 381
record keeping/time-out forms, 374–376
recovery room, 382
suction equipment, 382
surgical chair or operating table, 380–381
transport equipment, 382
venipuncture armamentarium and infusion pumps, 376–377
management of untoward anesthetic events in, 515–527
apology to patient and/or family, 521–523
appointment of defense counsel and post-event procedure, 519–520
certification for administration of sedation/anesthesia, 516
clinical documentation, 517–518
emergency medical services, 518–519
hospital emergency department, 519
informed consent, 518
maintaining your practice, 526
media, professional, and patient inquiries, 521
office protocol for medical emergency response, 516–517
reporting event to professional liability insurance carrier, 519
reporting to state regulatory agencies, 520
retaining personal counsel, 521
the second victim, 523–526
visititation at the hospital or funeral services, 520–521
pediatric sedation and, 467–478
approaches to management, 473–475
differences in physiology and anatomy, 468–469
equipment for, 475–477
preoperative evaluation and patient selection, 469–473
psychological assessment, 468
pharmacology, 439–451, 453–465
of intravenous sedative/anesthetic medications used in, 439–451
of local anesthetics used in, 453–465
respiratory anesthetic emergencies during, 479–486
common respiratory diseases, 480–481
common respiratory emergencies in adults, 481–485
physiology, 479–480
Angiotensin receptor blockers (ARBs), for perioperative hypertension, 500
holding vs. maintaining during surgery, 499–500
Angiotensin-converting enzyme inhibitors (ACEI), for perioperative hypertension, 499
holding vs. maintaining during surgery, 499–500
Anxiety, assessment of pediatric oral surgery patients, 468
Apologies, by surgeon to patient/family after untoward anesthetic event, 521–523
retention of personal counsel by, 521
Articaine, pharmacology of, 458
Aspiration, emesis and, in adults, 483–485
emergency protocol, 485
Assessment, anesthesia, for oral surgery, 367–371
intraoperative, 369–371
postoperative, 371
preoperative, 367–369
Asthma, anesthesia for OMS in patient with, 480–481
effect on anesthesia, and anesthetic management for, 416–417
Atlantooccipital surgery, in evaluation of adult airway, 387
Atrial fibrillation, effect on anesthesia, and anesthetic management for, 414
Atropine, for perioperative hypotension, 502
### B
- Benzodiazepines, intravenous, for sedation/anesthesia in OMS, 445–446
  - diazepam, 446–447
  - midazolam, 447–448
- Beta blockers, for perioperative hypertension, 493–495
  - holding vs. maintaining during surgery, 499–500
  - use in patients with obstructive airway disease, 493–494
- Black, Greene Vardiman, 346
- Bradycardia, management of perioperative hypertension with, 500
- Bronchitis, anesthesia for OMS in patients with chronic, 481
- Bronchospasm, in adults, 482–483
  - emergency protocol for, 485
- Buffering, of local anesthetics, 462–463
- Bupivacaine, extended-release, 463
  - pharmacology of, 458–459

### C
- Calcium channel blockers, for perioperative hypertension, 495–496
  - holding vs. maintaining during surgery, 499–500
- Capnography, equipment for an OMS practice, 380
- Cardiovascular anesthetic complications, in oral surgery, 487–506
  - perioperative hypertension, 487–501
  - perioperative hypotension, 501–504
- Certification, for administration of sedation/anesthesia, 516
- Chairs, surgical, for an OMS practice, 380–381
- Chronic obstructive pulmonary disease (COPD), anesthesia for OMS in patients with, 480–481
  - effect on anesthesia, and anesthetic management for, 418–419
- Clevidipine, for perioperative hypertension, 496
- Clonidine, for perioperative hypertension, 498
- Coagulation emergencies, with anesthesia in OMS, 513
- Cocaine abuse, effect on anesthesia, and anesthetic management for, 426–427
- Coleman, Alfred, 346
- Communication equipment, in an OMS practice, 374
- Complications, allergy and anaphylaxis management during OMS, 401–406
  - mild allergy, 401
  - patient evaluation for local anesthetic reactions, 403–405
  - severe allergy, 401–403
  - of local anesthetic use in OMS, 460–461
  - hematoma, 460
- Death. See also Untoward anesthetic event, first recorded due to anesthesia, 345
- Defense counsel, role in management of untoward anesthetic events, 519–520
- Depression, effect on anesthesia and anesthetic management for, 431–432
- Dexmedetomidine, as adjunct to intravenous anesthesia in OMS, 448–450
- Diabetes, effect on anesthesia, and anesthetic management for, 420–424
  - pediatric, preoperative evaluation for oral surgery, 472
- Diazepam, intravenous, use in OMS, 446–447
- Dihydropyridines, for perioperative hypertension, 495–496
- Diltiazem, for perioperative hypertension, 496
- Discharge, after oral surgery, 371
- Documentation, clinical, of untoward anesthetic events, 517–518
- Drugs. See Medications.
- Emergencies, with anesthesia in an OMS practice, 377–379, 393, 479–486, 507–514
  - airway equipment for, 377–378
  - coagulation, 513
  - drugs for, 378–379
  - endocrinopathies, 508–511
    - adrenal insufficiency, 510–511
    - glycemia control, 509–510
    - hyperthyroidism, 511
    - hypothyroidism, 511
    - pheochromocytoma, 510
  - in pediatric patients, 475–477
  - malignant hyperthermia, 507–508
  - management task training and team crisis simulations, 393
  - neurologic, 511–513
Emergencies (continued)
perioperative stroke, 512–513
seizures, 512
syncope, 511–512
respiratory, 479–486
untoward anesthetic events in, 515–527
untoward anesthetic events in the respiratory, 479–486
Emergency department, referrals to, for perioperative hypertension, 500
role in untoward anesthetic event at OMS practice, 519
Emergency medical services, role in untoward anesthetic event at OMS practice, 518–519
Emesis, and aspiration in adults, 483–485
emergency protocol for, 485
Emphysema, anesthesia for OMS in patients with, 481
Endocrinopathies, and anesthetic emergencies in OMS, 508–511
adrenal insufficiency, 510–511
glycemia control, 509–510
hyperthyroidism, 511
hypothyroidism, 511
pheochromocytoma, 510
Ephedrine, for perioperative hypotension, 502
Epilepsy, effect on anesthesia and anesthetic management for, 428–429
Epinephrine, for anaphylaxis/anaphylactoid reactions to anesthesia in oral surgery, 403
Equipment, anesthesia, in an OMS practice, 373–383
airway armamentarium, 377–378
communication equipment, 374
emergency drugs, 378–379
for pediatric patients, 475–477
inhalational anesthetic exposure control, 374
lighting system, 381–382
manifold system and remote gas storage, 373–374
monitors, 379–380
nitrous oxide exposure control, 374
office fire safety protocol, 374
operating suite, 379
oxygen and supplemental gas delivery system, 381
record keeping/time-out forms, 374–376
recovery room, 382
suction equipment, 382
surgical chair or operating table, 380–381
transport equipment, 382
venipuncture armamentarium and infusion pumps, 376–377
Esmolol, for perioperative hypotension, 494
Ethical issues. See Untoward anesthetic events.
Etomidate, intravenous, use in OMS, 442
F
Fentanyl, intravenous, for use in OMS, 445
Fire safety protocol, in an OMS practice, 374
Foreign body, evaluating the adult airway with, 391
Funeral services, surgeon attendance after untoward anesthetic event, 520–521
G
Gas manifold system, for anesthesia in an OMS practice, 373–374
Gastroesophageal reflux disease, effect on anesthesia and anesthetic management for, 426
General anesthesia, for oral and maxillofacial surgery, 363–364
Glycemia control, and anesthetic emergencies in OMS, 509–510

medications for perioperative, 492–500
ACEIs and ARBs, 499
beta-blockers, 493–495
calcium channel blockers, 495–496
clonidine, 498
costs of, 500–501
hydralazine, 496–497
nitroglycerin, 497
nitroprusside, 498–499
phentolamine, 498
metabolic syndrome, 489
office and ambulatory anesthesia and antihypertensive agents, 499–500
office surgery and, 491
pathologic effects of, 488–489
perioperative, 490–491
physiologic effects of, 489–490
primary care and emergency department referrals, 500
types of, 488, 489
effect on anesthesia, and anesthetic management for, 407–409
Hyperthermia, malignant, in OMS, 507–508
in pediatric patient, 472
Hyperthyroidism, and anesthetic emergencies in OMS, 511
effect on anesthesia and anesthetic management for, 432–434
Hypotension, perioperative, 501–504
controlled hypotensive anesthesia, 503
controversies in, 503–504
initial management, 501–502
management of refractory, 502–503
treatment of, 502
Hypothryroidism, and anesthetic emergencies in OMS, 511
effect on anesthesia and anesthetic management for, 432–434
I
Illnesses. See Medical illnesses.
Implantable cardioverter-defibrillators, effect on anesthesia, and anesthetic management for, 414–415
Infection, due to local anesthetics, 460
evaluating the adult airway with, 390
Informed consent, for anesthesia in the OMS practice, 518
Inhalational anesthetics, exposure control, for anesthesia in an OMS practice, 374
Insulin management, during anesthesia and OMS, 420–424
Insurance, professional liability, reporting an untoward anesthetic event to carrier, 519
Intradermal screening protocol, for local anesthesia for oral surgery, 404–405
Intraoperative monitoring, for oral anesthesia, 368–371
Intravenous sedative/anesthetic medications, used in OMS, 439–451
adjunctive agents, 447–450
dexmedetomidine, 448–450
ketamine, 447–448
benzodiazepines, 445–446
diazepam, 446–447
midazolam, 447–448
etomidate, 442
methohexital, 441
opioids, 442–445
alfentanil, 445
fentanyl, 445
meperidine, 444–445
morphine, 444
remifentanil, 445
sugentanil, 445
propofol, 441–442
thiopental, 440–441
Intubation, grading the difficulty of tracheal, 386
K
Keep, Nathan Cooley, 345
Ketamine, as adjunct to intravenous anesthesia in OMS, 447–448
Kidney disease, chronic, effect on anesthesia and anesthetic management for, 429–431

L
Labetalol, for perioperative hypertension, 494
Laryngoscopy, in evaluation of adult airway, 386–387
Laryngospasm, in adults, 481–482
emergency protocol for, 485
Latex allergy, in pediatric oral surgery
patients, 473
Legal issues. See Untoward anesthetic events.
Liability, for untoward anesthetic events, 515–527
reporting to professional liability insurance
 carrier, 519
Lidocaine, pharmacology of, 457
Lighting system, operating, for an OMS practice,
381–382
Lipid emulsion, in treatment of local anesthetic
toxicity, 462
Litigation, defense counsel's role in management of
untoward anesthetic events, 519–520
Liver disease, chronic, effect on anesthesia, and
anesthetic management for, 424–426
Local anesthetics, for use in OMS, 358–359
patient evaluation for allergic/anaphylactic
reactions, 403–405
initial results, 405
intradermal screening protocol, 404–405
long-term results, 405
pharmacology of, 453–465

Preoperative evaluation, for oral surgery, 367–368
  of pediatric patients, 469–473
  of the adult airway, 385–399
Prilocaine, pharmacology of, 457–458
Primary care physicians, referrals to, for perioperative hypertension, 500
Professional liability insurance, reporting an untoward anesthetic event to carrier, 519
Propofol, intravenous, use in OMS, 441–442
Protopappas, Tony, 352
Psychological assessment, of pediatric oral surgery patients, 468

R
Record keeping, for anesthesia in an OMS practice, 374–376
Recovery room, for an OMS practice, 382
Regulatory agencies, state, reporting untoward anesthetic events to, 520
Remifentanil, intravenous, use in OMS, 445
Respiratory anesthetic emergencies, during OMS, 479–486
  common respiratory diseases, 480–481
    asthma, 480–481
    chronic bronchitis, 481
Index

Respiratory (continued)
   COPD, 481
   emphysema, 481
   common respiratory emergencies in adults, 481–485
   airway obstruction, 483
   bronchospasm, 482–483
   emergency protocols, 485
   emesis and aspiration, 483–485
   laryngospasm, 481–482
   physiology, 479–480
   Respiratory infection, acute, effect on anesthesia, and anesthetic management for, 415–416
   Reversal, of local anesthetics, 461–462
   Rheumatoid arthritis, evaluating the adult airway with, 390
   Ropivacaine, 463–464

S
   Sedation, for OMS, 359–363
      in pediatric patients, 467–478
      minimal, 359–360
      moderate, 360–361
   Seizures, effect on anesthesia and anesthetic management for, 428–429
      with anesthesia in OMS, 512
   Seldon, Harry, 348
   Sexual assault claims, first recorded due to anesthesia, 345
   Smoking, effect on anesthesia, and anesthetic management for, 417–418
   Southern California Society of Oral and Maxillofacial Surgeons, 350
   Steroids, exogenous, effect on anesthesia and anesthetic management for, 427–428
   Stroke, perioperative, related to anesthesia in OMS, 512–513
   Suction equipment, for an OMS practice, 382
   Sufentanil, intravenous, use in OMS, 445
   Surgeons, apologies by, to patients/family after untoward anesthetic events, 521–523
      as “second victim” of untoward anesthetic events, 523–526
   Surgical chairs, for an OMS practice, 380–381
   Syncope, with anesthesia in OMS, 511–512

T
   Table, operating, for an OMS practice, 380–381
   Tachycardia, management of perioperative hypertension with, 500
   Teeter, Charles, 346–347
   Tetracaine, intranasal, 463
   Thiopental, intravenous, use in OMS, 440–441

Thyroid diseases, effect on anesthesia and anesthetic management for, 432–434
   Thyromental distance, in evaluation of adult airway, 388
   Time-out forms, for anesthesia in an OMS practice, 374–376
   Total intravenous anesthesia. See Intravenous sedative/anesthetic medications.
   Toxicity, in treatment of local anesthetic toxicity, 462
      of local anesthetics, lipid emulsions in treatment of, 462
   Tracheal intubation, grading the difficulty of, 386
   Transport equipment, for an OMS practice, 382
   Trauma, evaluating the adult airway with, 391
   Trismus, muscle, due to local anesthetics, 460
   Tumors, evaluating the adult airway with, 391

U
   Untoward anesthetic events, in an OMS practice, 515–527
      apology to patient and/or family, 521–523
      appointment of defense counsel and post-event procedure, 519–520
      certification for administration of sedation/anesthesia, 516
      clinical documentation, 517–518
      emergency medical services, 518–519
      hospital emergency department, 519
      informed consent, 518
      maintaining your practice, 526
      media, professional, and patient inquiries, 521
      office protocol for medical emergency response, 516–517
      reporting event to professional liability insurance carrier, 519
      reporting to state regulatory agencies, 520
      retaining personal counsel, 521
      the second victim, 523–526
      visitation at the hospital or funeral services, 520–521

V
   Valvular heart disease, effect on anesthesia, and anesthetic management for, 411–413
   Vasoconstrictors, pharmacology of, 459
   Ventilation, mask, grading the difficulty of, 386
   Visitation, by surgeon after untoward anesthetic events to, 520–521

W
   Wells, Horace, 343
   White, Samuel Stockton, 345–346
